*All submissions must have your company's management approval of the content of the poster.

Each participant will be provided with a tack board for mounting data. Common and very readable poster sizes are 56" wide by 42" high or 48" wide by 38" high.

Abstracts should be a single paragraph (approx. 300 words).

The title (20 words max.) should convey the abstract subject matter without excessive detail. Tables of data are not permitted in the abstract. Do not use trade names, technical jargon, names of products, companies or institutions, or abbreviations other than units of measurement.

Each sentence in the abstract should be examined out of context for clarity and economy of words. The abstract should be unified, coherent, and logical in its progression from one section to the next. Have grammar, punctuation, and spelling checked by more than one reviewer before final submission. A person unfamiliar with the work may be helpful in pinpointing problems in content. Review abstracts and posters from past meetings to get a feel for style and format.

Authors are advised to consider the following when you put your posters together:

Quality and Content of Photos (clear, easily understood, subject merit).

Organization and Flow (abstract, introduction, methods, conclusion).

Relevance (is material relevant to the fields of laboratory animal science and will it make an impact).

Innovation or Refinement (will information advance current knowledge of laboratory animal science).

Overall Appearance (the big picture)
